

HYDROFARM SAVINGS!

PHANTOM DE

OUTPERFORM THE COMPETITION

The Phantom 50 Series commercial DE system was designed to provide a competitive advantage. Phantom ballasts have a proven track record of quality, reliability, and performance. Independent testing has proven that Phantom DE systems deliver more plant-usable light per square meter than any other systems in their class. The high frequency ballast design is optimized specifically for double-ended 1000W HPS lamps. The 50 Series driver features a premium grade microprocessor to push the lamp to the highest possible output with minimal electrical waste.

Find out more about Phantom's performance, efficiency, reliability, and safety at PhantomBallast.com.
